Sangoma suite

POWERED BY Business Voice

Seamless, Ultra-flexible Cloud Communications

Business Voice is the ultimate cloud communications platform for any business in need of seamless, ultra-flexible connectivity. As a pure cloud platform, businesses can leverage the power of a complete communications solution from an intuitive, browser-based interface. No hardware required!

Business Voice Features & Benefits

Pure Cloud Architecture

Business Voice is built on a pure cloud platform. Designed for businesses who want peerless call quality, communications flexibility, and exceptional system support, Business Voice is the perfect, zero-hardware option.

Multi-location Flexibility

Business Voice optimizes your operations from one location to many. All phones are connected and operate as a single system allowing for direct extension dialing, seamless call transfers, ring groups, call queues, and more.

Intuitive Management

Business Voice is a user-friendly platform that prioritizes the user experience with intuitive management controls. Users can navigate to their critical communications tools with ease to stay connected, efficient, and productive.

Proprietary Network Backbone

Business Voice is run on our proprietary private backbone, a redundant, reliable, and secure communications network for your mission-critical communications. We built our architecture with your business in mind to help support you with ultra-reliable, high-quality communications.

Communicate Your Way

Take control of your business communications with Sangoma. With flexible pricing, discounts on multiple as-a-service products, and innovative features- you can pick the bundle that is right for your business and receive discounts on other services to round out your communications ecosystem!
